

IMMUNIQ-A (UK/EU)

FUNCTIONAL BEVERAGE POWDER BLEND

A specialised ingredient blend intended for use in immune support-focused functional beverage recipes. With Turkey Tail, Ginger, Vitamin C, and Zinc Gluconate, IMMUNIQ-A delivers the ingredients commonly sought in products positioned for immune system support and antioxidant protection.

Functional Focus

A dry, powdered functional blend designed to support immune-focused beverage formulations. Reishi mushroom and ginger extracts are paired with Vitamin C and Zinc, nutrients widely used in immune-support beverage formulations.

Product Use

IMMUNIQ-A is designed for versatility across a wide range of beverage applications. This blend has a largely neutral flavour profile with a subtle hint of ginger, allowing it to integrate easily into functional drink formulations based on fruit juices and juice drinks, flavoured carbonated beverages, sports drinks, teas, coffees, and low-to-no alcohol beverages. IMMUNIQ-A dissolves readily in water and confers a natural light brown hue to beverages.

Dosage Information: Recommended use levels are provided below for guidance. Please note these are subject to regulatory requirements – refer to the Regulatory Guidance section for further details.

Recommended Dosages for IMMUNIQ-A					
Pack size	IMMUNIQ-A Dosage:	g per serving (approx.)	1.4 g dose provides (approx.)	NRV	Bioactive compounds provided
330 ml	4.2 g / L	1.4 g	Reishi extract - 1040 mg	*	Polysaccharides, β-glucans,
355 ml	3.9 g / L				Triterpenes
440 ml	3.2 g / L		Ginger root extract - 200 mg	*	Gingerols
473 ml	3.0 g / L		Vitamin C - 90 mg	113%	L-ascorbic acid
500 ml	2.8 g / L		Zinc - 10 mg	100%	Elemental zinc
Maximum recommended dose: 1.4 g per day					

*Nutrient Reference Value (NRV) not established

pH Tolerance: Recommended final product pH of ≤ 4.0 for optimum stability of bioactive compounds.

Pasteurization: The blend is compatible with typical beverage pasteurization processes. The heating process may affect the bioactive compounds within product; however, extent is variable depending on methodology.

Blending method: Product should be added pre-carbonation to avoid foaming. To maintain quality of bioactive compounds, adding post-fermentation, pre-carbonation and pasteurization is preferred. However, can be added hot side if pasteurization is not available.

Please note that the usage information provided in this document is based on our current knowledge and is intended only as guidance for formulation and processing. Customers are responsible for the verifying suitability, safety, and stability of this product in their own specific finished product applications. Bevie Partners Limited accepts no liability for any loss or damage arising directly or indirectly from reliance on the information contained in this document.

Packaging

IMMUNIQ-A is supplied in 0.5, 1.125, or 3.0kg HDPE tubs. Containers meet all food industry packaging regulations.

Safety

This material is toxic to aquatic life in its concentrated form as supplied. Dispose of waste to an approved waste disposal plant in accordance with local regulations. Once diluted in the finished product, this classification does not apply. For comprehensive hazard information and safe handling guidance, please consult the Safety Data Sheet (SDS).

Please note that end consumers are advised to check with their GP or healthcare provider before taking food supplements if they are pregnant, breastfeeding, have any medical conditions or are taking any regularly prescribed medication.

Storage

When stored in a cool, dry, and well-ventilated place away from direct sunlight and moisture, the shelf-life is 18 months from the manufacture date. Once opened, reseal tightly and use within 30 days.

Regulatory Guidance

This product is supplied for use in the formulation of finished beverage food supplements which must comply with relevant food supplement legislation. The information contained in this document is provided for guidance purposes only and does not constitute regulatory advice. Customers are solely responsible for ensuring the compliance of their finished products with all relevant legislation in their target markets, including but not limited to the following regulations:

European Union:

- Food supplements composition and labelling: Directive 2002/46/EC
- Food information to consumers: Regulation (EU) No 1169/2011
- Nutrition and health claims: Regulation (EC) No 1924/2006

United Kingdom:

- Food supplements: The Food Supplements (England) Regulations 2003 (and devolved equivalents for Scotland and Wales)
- Food information: The Food Information Regulations 2014; Retained Regulation (EU) No 1169/2011 (as amended)
- Nutrition and health claims: The Nutrition and Health Claims (England) Regulations 2007 (as amended 2024)

Customers should seek independent regulatory advice to confirm compliance with all applicable compositional requirements, permitted ingredient lists, maximum use levels, nutrition labelling obligations, and nutrition and health claim regulations in each market in which their finished product is intended to be sold. Bevie Partners Limited accepts no liability for the regulatory compliance of finished products manufactured using these ingredients.
